And
9. (Amended) A method according to [any one of claims 1 to 7] claim 1, wherein the documents are HTML documents stored in a stand alone data processing device.

10. (Amended) A method according to [any one of the preceding claims] claim 1, wherein the documents including the references are in the form of text documents or files and that said referenced documents are text and/or image and/or sound files or the like.

11. (Amended) A method according to [any one of the preceding claims] claim 1, wherein said transformation transforms the links into Uniform Resource Locators (URLs).

A2
14. (Amended) A method according to claim 12 [or 13], the arrangement being implemented in a network environment or in a stand alone data processing device or in both.

15. (Amended) An arrangement according to [any one of claims 12 to 14] claim 12, wherein the browsed documents are HTML documents stored in a WWW server connected to an Internet by means of a http protocol.

16. (Amended) An arrangement according to [any one of claims 12 to 15] claim 12, wherein the browsed documents are HTML documents stored in a stand alone data processing device.

17. (Amended) An arrangement according to [any one of claims 12 to 16] claim 12, wherein the documents including the references are in the form of text documents or files and that said referenced documents are text and/or image and/or sound files or the like.

18. (Amended) An arrangement according to [any one of claims 12 to 17] claim 12, wherein the document references are the form of Uniform Resource Locator (URL).

19. (Amended) An arrangement according to [any one of claims 12 to 18] claim 12, wherein the files are arranged to be transmitted and/or handled in a compressed form ([eg.] e.g., in a ZIP form).
